Sec1 Sci ALL Mind map exemplars from students 2018 aged 11

Mind mind map for just one topic:

This mind map has some good qualities, it does use some colour, and it tries to use diagrams and connections to better display the student’s understanding, but it is obvious that very little time has gone into this activity.

This is much neater and clearly has had more thought and time go into it, but I was there when the student ran out of time. So a great start at least.
Mind map for a topic book

There are diagrams, colour and details here, and although it is a little messy, it is still a good piece of work.

*The two mind maps that follow, however, are both exceptional mind maps that were produced by the ablest students in their year group. SMASHING!!! Work!*
